# **More Than Just** a Mail Server

#### Get Five in One

Cross-platform collaboration

Wireless mobile synchronisation

Robust email security

Email archiving Automated backup

Reviews

"While the product is called a "Mail Server" the truth is, it does far more than just serve e-mail. Kerio MailServer (Kerio Connect) is an e-mail, calendaring, contact, and to-do server that runs on three versions of the Mac OS, three Linux distros, six versions of Windows, as a VMWare virtual appliance, or a Parallels virtual appliance. KMS is nothing if not flexible." John C Welch Macworld.com

"Kerio Connect was easier to use, less expensive, and provided more functionality than other products and provided the integration with Active Directory. Akis Fotakelis Windows IT Pro

# **Testimonials**

"Security is without doubt the strength of Kerio Connect. Other features offered by the solution, such as the sharing of contacts, activities and appointments, have allowed us to improve teamwork." Roberto Polinelli Mercedes Benz Italy

"Our OS X mail server no longer served our current needs. Kerio Connect is easy to administer and comes with advanced antispam, anti-virus and scheduling features. We can better manage incoming emails and analyse unspecified addresses." Martin Fredrik **DOK Architects** 

## Global Reach

Kerio Connect is used by thousands of schools, businesses, government agencies, and non-profit organisations in 138 countries.

# **About Kerio**

Innovating in Internet security since 1997, Kerio Technologies, Inc. provides Internet messaging and firewall software that is simple, stable, and secure.

Kerio is headquartered in San Jose, California, and has offices in New York, Great Britain, Germany, Czech Republic and Russia. Kerio is a member of CalConnect, a premier member of the Apple Developer Connection and a Microsoft Gold Partner.
